There’s no substitute for a dump body or trailer manufactured by J&J Truck Bodies & Trailers.

To be removed from our mailing list, email sales@jjbodies.com and provide the information on your mailing label or call 814.444.3452.

Tri County Motor Sales provided this International® chassis and J&J mounted a polished aluminum barrel style dump truck body. It was purchased by a trucking/mining firm in Maryland.

Half round dump bodies are primarily used in paving applications, hauling asphalt and other similar materials.

Many in the hauling industry believed heated dump bodies were a thing of the past due to new emission regulations. However, the innovative engineering group at J&J has created our best heated dump body option ever!

J&J’s heated dump body option features an in-cab LED screen that monitors exhaust temperatures at the dump body and automatically shuts down exhaust flow to the dump body during the extremely high temperatures reached during DPT regeneration. The heat system can be manually turned on and off from the in-cab console and the system automatically shuts down when the PTO is engaged.

Trust J&J to bring you the latest technology to keep you rolling when “Old Man Winter” and the regulatory authorities are trying to shut you down with cold or frozen loads.

New Trucks for PennDOT

J&J Truck Bodies & Trailers recently delivered close to 40 of these medium-duty dump bodies to the Pennsylvania Department of Transportation. The International® chassis were mounted with 10 foot J&J polished aluminum bodies. A variety of auxiliary lights were installed to provide a safe environment when these trucks are used during the winter months when road conditions can become hazardous.

These trucks will be used by the agency year round to maintain and clear roadways, haul construction materials, paving projects, and a variety of other jobs. The chassis were provided by Five Star International in Harrisburg, Pennsylvania.
Jeff Reeping was appointed to the position of industrial sales representative for Somerset Welding & Steel which is J&J’s parent company. In this capacity, Jeff will be responsible for establishing, developing, and maintaining new accounts in the area of custom welding and fabrication, a growing customer segment for Somerset Welding & Steel. Jeff has been with the company for 13 years and was instrumental in the development and implementation of the ISO quality standard. Bill Riggs, president of SWS, said, “Jeff brings valuable experience in manufacturing, quality assurance, and fabrication estimating to our company. His background and education will be an asset to Somerset Welding.”

The new PARALIFT™ PST 20K steerable lift axle from Hendrickson revolutionizes this product category with best in class performance including:

• 1,375 lbs. fully dressed with the rugged durability of an I-beam axle
• 25 degrees of wheel cut
• Adjustable frame width and ride height, allowing multiple applications with just one unit to stock
• Lift springs that stay parallel throughout their travel ensuring maximum clearance and air spring durability

Today, the market requires a wide variety of weight capacities to adhere to local and federal regulations. PARALIFT maintains the rugged reliability you’ve come to expect from Hendrickson, while reducing weight by 150 lbs. over the competition.

PARALIFT also delivers an easy-to-install, lightweight compact package with Hendrickson’s proven name for durability and support.

For more information, contact the company through their web site at www.hendrickson-intl.com or call 800.660.2829.

The information for this article was provided by Hendrickson. J&J Truck Bodies & Trailers does not endorse any one specific lift axle company.

Eighteen of these steel live floor transfer trailers were built and shipped to Africa where they will be used primarily for waste hauling applications. In addition to live floor trailers, we also build tippers and aluminum and steel push outs. Call us for fast quotes, quality products, and on-time delivery.

Siberia Bound

Seven of these steel dump bodies were sent to Siberia where they will be used to haul sand to gas well drilling sites. The custom dump bodies are 24 feet long, 112 inches wide, and have 86 inch sides. The trucks were loaded onto “wide load” trailers for special delivery to the port where they were loaded onto the ship for the final part of their journey.

NEW, IN-STOCK truck tires for sale. Many sizes available. Bonus discount pricing. Email or call today for more information and details - gaa@jjbodies.com or 800.777.2671 and ask for Gail.

For more information, email sales@jjbodies.com or call 800.777.2671 or 814.444.3400.
A truck dealer in West Virginia recently ordered this custom service body for their International® chassis. The truck is outfitted with an Auto Crane Titan body that features several storage units, shelves, a 10,000 lb. capacity crane, a hydraulic compressor, and many other options.

Service trucks are primarily used to repair and maintain heavy equipment. The trucks can haul a wide variety of parts, tools, components, and equipment making it much more convenient and efficient to repair heavy machines at the job site rather than having them hauled to mechanic shop.

At J&J Truck Equipment, we can put together a specification package that meets your needs. Call us today! 877.455.8785

Repair and Refurbish

New Trucks are a Major Investment!

Extend the life of your existing equipment with quality refurbishing at J&J Truck Equipment. We have the experience and capabilities to repair and refurbish your equipment for a fraction of the cost new. Increase production, reduce downtime, and achieve your goals while staying within your budget.

Snow and Ice Control

Major price reductions on Swenson under tailgate stainless steel spreaders. Our “S” Series spreaders are designed to mount below the dump body tailgate and won’t interfere with normal dump body operations. Call us for a quote today!

Attention Roadway Managers!

We are authorized distributors for the AccuBrine System, a highly effective solution for combating snow and ice on the roadways. The AccuBrine automated brine maker is an investment that produces valuable returns in the safety of roads and overall reduction in operational costs and headaches.

At J&J Truck Equipment, we provide our customers with customized truck equipment solutions for their specific hauling and trucking applications.
